

VEHICLE MANAGEMENT SYSTEM USING SALESFORCE

TEAM ID :NM2023TMID18425

1. INTRODUCTION

1.1 Overview

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these question, then you're in the right place. This module is for you.

Welcome to salesforce! Salesforce is game-changing technology, with a host of productivity –boosting features, that will help you sell smarter and faster. As you work toward your badge for this module , we'll take you through these features and answer the question, “What is salesforce, anyway?”

1.2 Purpose

A vehicle management system –or platform – that server to manage commercial fleets of vehicles , such as cars , vans or trucks – or even heavy equipment – to ensure they are utilized safely , efficiently and professionally, while making sure they are well maintained and high- performing .

2 Problem Definition & Design Thinking

2.1 Empathy map

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

PROJECT REPORT TEMPLATE

5 . Advantages & Disadvantages

Advantages :

- Improve fleet safety .and working conditions
- Good for long drives.
- Personal vehicle meaning it's upto you where and when you want to go .
- Good for rainy days .

Disadvantages :

- Takes too much space causing traffic jams.
- Parking is costly and is quite difficult to find a good spot.
- Regular maintenance .

- Fear of getting your car scratched or dented by another irresponsible person.

6. APPLICATIONS

- * To be a system supplier doesn't mean only supplying motors and controllers ,but supplying the right motor and the right controller that optimize the application in terms of efficiency,performance and cost.
- * Dana TM4 sales and application engineering team work in close partnership with the customer to develop the vehicle design on all aspects relating to the power train.
- * Starting from the target performance of the vehicle , using proprietary software for motion simulation ,Dana TM4 is the expect that will help you to select the right components of the power train and harmonize the overall project.

7. CONCLUSION

In this study , our proposed applications focus on dealing with the user requests and vehicle management in real time. Through the history of vehicles and record , we can analysis the behavior effective of vehicles. Thus, the proposed system provides effective and hospitality customized services .Moreover ,the golf resources can be optimized at allocation the operation.

8. FUTURE SCOPE

It will bring a number of benefits to society. Less pollution ,more safety,more free time and services.And at the end of it all .
